

# Smarter energy storage with Enequi and Nilar

## QuiPower Storage from Enequi is more than just a user-friendly Nilar battery for property owners. It's the brains behind an intelligent home energy system with multiple technology options to meet your needs.

QuiPower Storage makes it easier than ever to manage your energy on your terms. Powered by Nilar batteries, it provides a safe and intelligent storage solution that guarantees a smooth flow of clean energy for your household needs.

### Take control of your energy supply

Thanks to its advanced software, QuiPower Storage learns your energy consumption patterns to store the most affordable energy for use during peak periods. For solar-powered homes, it allows you to save more of your solar energy production for self-consumption, or to buy and sell energy at the best available price. Equipped with off-grid mode, it also enables safe production and usage of solar energy during power outages. With QuiPower Storage at the heart of your home energy system, it's now possible to lower your energy costs and your environmental footprint for many years to come.

“Energy demands are changing fast. We believe property owners deserve a solution that automatically stores and supplies the energy they need, for when they need it most. It should be safe, easy to use and environmentally friendly. This is why we chose Nilar batteries, which have unique advantages in terms of safety and environmental impact.”

**Julia Erikson**  
Marketing Manager Enequi

### Designed to evolve with your needs

QuiPower Storage can be used with new and existing solar panel installations, or to store low-cost energy from the grid. Options include QuiPower Off-Grid for continued solar production and energy consumption during power outages, as well as QuiPower Charger for charging of one or more electric vehicles. Whichever system you choose, the QuiPower App makes battery charging status, allocation preferences and real-time energy flows visible in real-time, from any device.

#### About Enequi

Enequi is a Sweden-based developer and supplier of solutions for energy storage, electrical installation, metering and industrial automation. Our solutions are based on decades of industry experience and a commitment to putting property owners in charge of their energy supply for a trouble-free transition to the era of clean energy.
